Dear George,

25X1A9a

25X1A9a

There is attached hereto a draft memorandum from [REDACTED] to Buck Rogers, which we felt might be the basis for the assignment of Jim to IPC, USAFE.

25X1A9a

When [REDACTED] was here he made it quite clear to Jim that he intended to manage the IPC in the same way that WTPC was operated here; i.e., as though assigned personnel were part of his staff, subject to his complete jurisdiction. This is not the way the photo activities are set-up in the field and it is not intended that the ELINT centers will operate this way either. There is attached hereto a copy of the policy and procedures developed within the Ad Hoc Requirements Committee which spells out the ELINT relationship. A copy of this should also be available to Colonel Rogers through his Air Force channel.

It is most important that we use the term "detail" in relation to Jim's assignment. We do not want to be hard-nosed about this business but it is important that we maintain the proper relationship between our man or men and the rest of the IPC.

Sincerely,

Ralph
